## For Immediate Release

### **NuVision Networks, Corp Enters strategic partnership with Compass Technologies**

Compass Technologies, Exton, PA and NuVision Networks, Corp, Napa, CA have entered into a strategic partnership for a fully integrated “one card” solution providing both patron accounting and access control.

Compass Technologies, Inc., designs, manufacturers and supports Access Control and Security Management systems and provides products that integrate new technologies, enhance safety and assure the security of people, property and information systems.

NuVision's *iAMECS Advanced Server* one card system provides campus data management, accounting and meal plan control which integrates with Compass Technologies' campus perimeter building access.

The new partnership emphasizes the full integration of both companies' systems.

*iAMECS Advanced* and Compass share the same partitioned SQL Server database. Information sharing, changes, updates and communication are instantaneous. *iAMECS Advanced Video Pro's* captured ID card images become part of the Compass access control systems. Compass Technologies, maintains an extensive network of dealer/installers throughout the US and Canada that insures systems will be fully supported.

Compass Technology manufacturers all of its own hardware, a unique attribute in the industry. Compass systems support multiple technologies on a single door, allowing the use of swipe cards and proximity devices for ADA. Compass and *iAMECS Advanced* communicate over TCP/IP.

Jerry Cordasco, Vice President and General Manager for Compass Technologies said, “NuVision is a unique company. The strategic partnership between us will allow distinct solutions to our customers. NuVision's, *iAMECS Advanced* one card system, helps to improve campus operation and drastically cuts administrative costs while improving service to students, faculty and staff. Together Compass and NuVision will develop new solutions focused on higher education facilities with network security our primary concern.”
